### KIMMINS SCRAP DIVISION

Kimmins is a scrap recycler of ferrous and nonferrous metals, serving the recycling needs of a wide variety of industries in the Tampa Bay area.

We can deliver a roll off can to your yard and/or jobsite as well as send a transport to pick up large pipe, tanks and old equipment.

Our limestone aggregate is recycled fossil stone mined in South Central Florida. Screened and washed, the material is used for many applications. Kimmins continually innovates in order to minimize the use of virgin aggregate resources. Our limestone is a recovered material that is double washed and screened to size. We size the limestone to meet a #89 and #57 course aggregate specification. Our ballast is a 2"-4" limestone that is used for ditch lining, temporary driveways and landscaping.

### **YARD ADDRESS:**

1921 N. 53rd Street, Tampa  
Monday thru Thursday;  
7:00 AM – 5:30 PM  
Friday; 7:00 AM – 3:30 PM
